Scope of Lesson

- Terminology
- Formulas
 - Time Distance
 - Density
 - Pass Time
- Scenarios
 - DD Form 1265 (Request for Convoy Clearance)
 - DD Form 1266 (Request for Special Hauling Permit)
- PE

Convoy Operations and the UMO

- Once given certain information about the convoy movement (start times, end times, rest halts & locations), the UMO:
 - Prepares a Road Movement Table
 - Prepares DD Forms 1265 & 1266
- The UMO should know the basic terms and formulas that are used in convoy planning and be able to compile/check DD Forms 1265 and 1266

Terminology

- Distance (D): How far a march column travels expressed in miles or kilometers
- Time (T): How long it takes to complete a move, including halts
- Rate (R): Kilometers or miles traveled in an hour (speed)

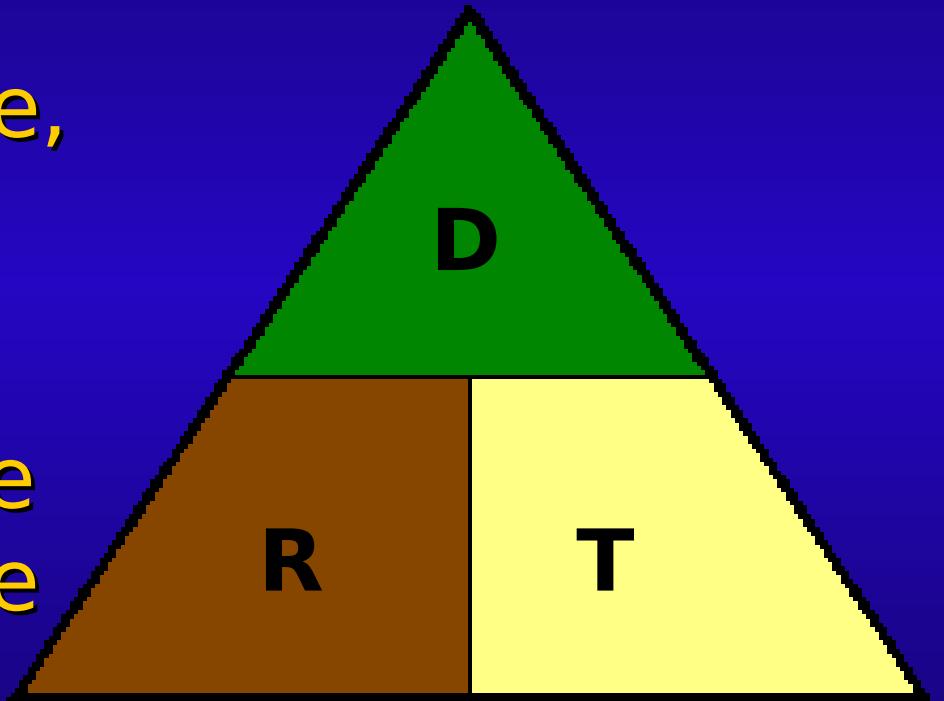

Distance, Rate & Time

- The three basic factors

factors are: Distance,

Rate & Time

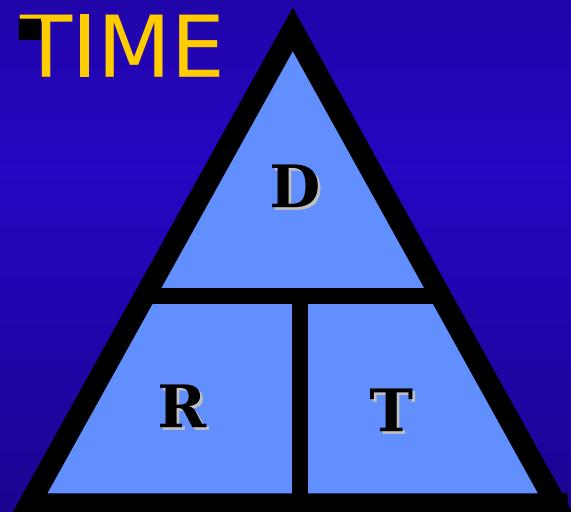

- When two of the three factors are known, the third can be found by simple math equation

Time Distance Calculations

DISTANCE = RATE \times

RATE = DISTANCE
TIME

TIME =

Time Distance

**RELEASE POINT
FT STORY**

**START POINT
FT EUSTIS**

45 MPH

(45 MPH)

Time Distance Formula

- Time Distance:

- The time required for a vehicle to move from one point to another at a given rate of march (Move from SP to CP1)

$$\frac{\text{Distance (miles)}}{\text{(minutes)}} \times 60 = \frac{\text{TIME}}{\text{Rate (mph)}}$$

$$\frac{11 \text{ (miles)}}{40 \text{ (mph)}} = 0.275$$

$$0.275 \times 60 = 16.5 \text{ minutes} = 17 \text{ minutes}$$

D, R & T & DD Form 1265

- Computation of the time it will take to arrive and depart a particular point is crucial
- Computation results in ETAs and ETDs of march column at state lines, major road junctions, bridges, tunnels, checkpoints & other critical points
- Must determine “Density” and “Pass Time”

Density

1 Mile

Density Formula

- Density is the number of vehicles, with an constant vehicle gap, in a mile

$$\text{Density} = \frac{1760 \text{ yards (1 mile)}}{\text{Vehicle gap in yards} + \text{average vehicle length in yards}}$$

$$\text{AVG. VEHICLE GAP} = 100 \text{ YDS} \quad \frac{1,760}{100+10} = 16 \text{ VPM}$$

$$\text{AVG. VEHICLE LENGTH} = 10 \text{ YDS}$$

(Always ROUND rather than round up, eg $16.1 = 16$ VPM,
 $16.5 = 17$ VPM)

Density Calculations

- Calculating the Average Vehicle Length:
- Step 1: Use TB 55-46-1 to find the length of vehicles. Note that all vehicle lengths are given in inches (note vehicle unions)
- Step 2: Add all vehicle lengths together
- Step 3: Divide by the number of vehicles
- Step 4: Divide the average length (given in inches) by 36 (36 inches in a yard).
- Answer = Average vehicle length in yards

Density Calculations (cont)

- Calculating the Average Vehicle Length:
- Use the TB 55-46-1 to find the following vehicle lengths

Vehicle
Length

M915/ M131A4C

Length

Vehicle

M 929A2

M35A2C /M149

M 931A2

M931/M871

M998

Density Calculations (cont)

- Step 4: Divide the average vehicle length (given in inches) by 36 (36 inches in a yard)

$$\frac{\text{_____}}{36} = \text{ yards (always round up)}$$

- The average vehicle length for this convoy is therefore yards

Pass Time

A GIVEN POINT

TIME GAP BETWEEN MARCH UNITS: EG TEN MINUTES

Pass Time

- Pass Time: The length of time required for a convoy (or a subgroup) to pass a given point on the route
- Knowing how to compute pass time is essential to a planner who must calculate a
- Don't forget to include the time gaps (time interval between elements of a convoy as they pass a given point) when calculating the pass time

Pass Time Formula

- Pass Time / Time Length:
 - Length of time it takes for the entire march column to pass a given point

$$\text{Pass Time} = \frac{\text{Number of Vehicles} \times 60}{\text{Density} \times \text{Rate}} + \text{Time Gaps or Extra Time}$$

(in mins)

Pass Time Calculation

- Pass Time / Time Length:

$$\text{Pass Time (in min)} = \frac{\text{Number of vehicles}}{60} \times \text{Density} \times \text{Rate}$$

$$\frac{20 \times 60}{20 \times 45} = \frac{1200}{900} = \frac{1.3}{3}$$

= 2 minutes (always round up)

Time Gaps

A MARCH COLUMN - NO TIME GAP

MARCH COLUMN DIVIDED INTO TWO ELEMENTS - ONE TIME GAP (EG 10 MIN)

MARCH COLUMN DIVIDED INTO THREE ELEMENTS - TWO TIME GAPS (EG 10 MIN)

Pass Time Calculations (cont)

① + 0 FOR THE TIME

GAP

$$\frac{20 \times 60}{20 \times 45} = \frac{1200}{900} = \frac{1.3}{3} \text{ (always round up)} = 2 \text{ mins} + 0 \text{ (time gap) (Mins)} = 2$$

② + 20 MIN FOR THE TIME GAP

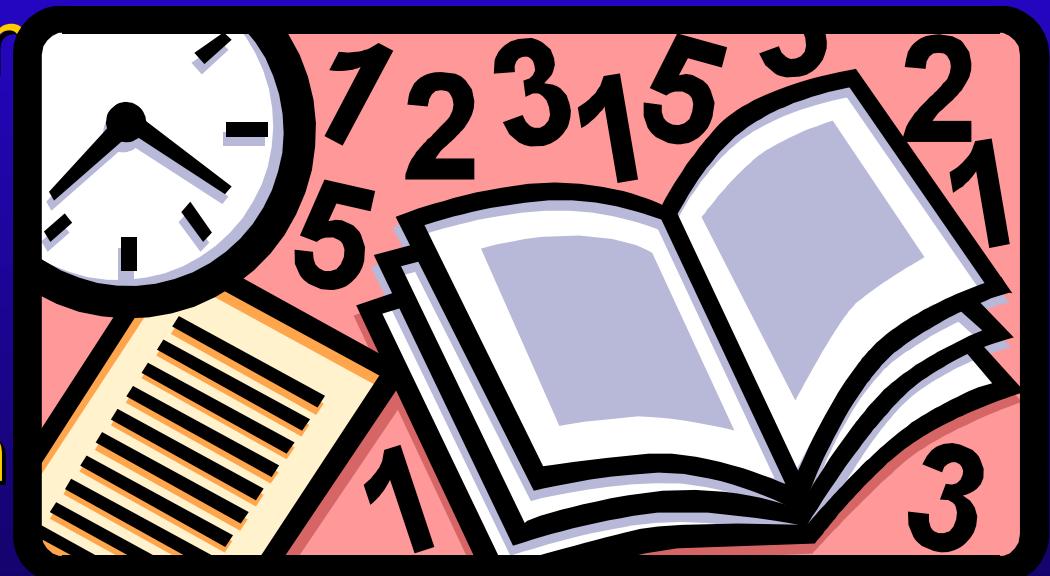

$$\frac{20 \times 60}{20 \times 45} = \frac{1200}{900} = \frac{1.3}{3} \text{ (always round up)} = 2 \text{ mins} + 2 \text{ (time gap) (Mins)} = 22$$

SUMMARY

- Simple convoy calculations involving the three basic factors of distance, rate and time
- Time Distance formula
- Density formula
- Pass Time formula

DD Form 1265 & DD Form 1266

DD Form 1265

Request for Convoy Clearance

- DD Form 1265 is the form completed by the UMO to request convoy clearance
- No convoy movement is permitted over public highways without a Convoy Clearance Number (CCN)

DD Form 1266

Request for Special Hauling Permit

- Completed by UMO or alternate UMO
- Forwarded in same channels as DD Form 1265
- Used to obtain special hauling permits for highway movement of oversize/overweight vehicles (as part of a convoy or separately)

OVER-DIMENSIONAL/OVER-WEIGHT VEHICLES

- Dimension and weight limitations vary from state to state (see Appendix E of FM 55-30)
- Check local rules and restrictions before any convoy movement
- Gross planning purposes - vehicles considered over-dimensional/over-weight if they exceed any one of the following dimensions/weight: 6 inches)

Height:	162 inches (13 feet, 6 inches)
Length:	60 feet for semi-trailers
Weight:	20,000 pounds for single axle
	34,000 pounds for tandem axles
	80,000 pounds gross weight

FM 55-30 Appendix

INSTRUCTIONS
SPECIFIC:

GENERAL:
DD Form 1266, "Request for Special Hauling Permit" will be used to obtain special hauling permits for the movement of oversize/overweight vehicles over public highways when accompanying a convoy or when traveling separately.

Transmissions in accordance with the letter of transmittal, will be forwarded through the local transportation office, as to reach the appropriate headquarters not less than ten (10) working days prior to the starting date of the movement. Letters of transmittal will contain complete itinerary and explanation of the movement. One (1) letter of transmittal is sufficient when several DD Forms 1265 and 1266 involving one (1) movement are forwarded to the appropriate headquarters.

In the event that telephone or electronic communications exist, the information contained in this form and DD Form 1265 may be transmitted to the appropriate headquarters by telephone or electronic transmission. In this event, reference will be made to item numbers in the sequence in which they appear on the forms. Items which do not apply will be so indicated.

Item 12, a, b., c., and d. - Complete nomenclature of vehicles involved. More than one unit may be included, provided units are identical in equipment, load characteristics, routing and movement date. Total number of units shall be indicated prominently.

Item 12, e. - Note all units other than standard highway vehicles; road equipment; guns, etc.

Item 12,d. - Indicate the registration number for each unit or combination of units. Use additional page if required.

Item 17 - Indicate appropriate number of axles by inserting number in proper circles. Block out circles not applicable.

Item 24 - For movement through the District of Columbia, include name of manufacturer of equipment.

INSTRUCTIONS			
GENERAL: DD Form 1266, "Request for Special Hauling Permit" will be used to obtain special hauling permits for vehicles which are size/overweight vehicles over public highways, when traveling in a convoy or when traveling separately. This form, in duplicate and accompanied by a letter of transmittal, will be forwarded through the local traffic control center to the appropriate headquarters not less than ten (10) working days prior to the starting date of the movement. Letters of transmittal will contain complete itinerary and explanation of the movement. One (1) letter of transmittal is sufficient when several DD Forms 1265 and 1266 involving one (1) movement are forwarded to the appropriate headquarters. In cases where bona-fide emergencies exist, the information contained in this form and DD Form 1265 may be transmitted to the appropriate headquarters by telephone or electronic transmission. In this event, reference will be made to item numbers in the sequence in which they appear on the forms. Items which do not apply will be so indicated.			
SPECIFIC: Complete nomenclature of vehicles may be included, provided units are characterized, routing and movement shall be indicated prominently. Item 12.e. - Note all units other than standard highway vehicles; road equipment, guns, etc. Item 12.d. - Indicate the registration number for each unit or combination of units. Use additional page if required. Item 17 - Indicate appropriate number of axles by inserting number in proper circles. Block out circles not applicable. Item 24 - For movement through the District of Columbia, include name of manufacturer of equipment.
